Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Tuesday 28 Sep 2021

UK Outlook for Wednesday 13 Oct 2021 to Wednesday 27 Oct 2021:
Confidence in this period is low, however the most likely outcome is for a north-south split, with low pressure and the wettest weather remaining in the north, while pressure continues to build in the south or southwest leading to drier conditions. Later in this period, there is the chance for more settled conditions to become more widely prevalent. Temperatures are likely to be around or slightly above average.
